

AMBULANCE VEHICLES

The product is assigned for requirements of express and first-rate medical assistance and a rapid ferry of patients to regional hospitals equipped with intensive care units. Ambulance is fully equipped with the most modern medical facilities satisfying the strictest requirements to equipment of ambulance vehicles.

Ambulances are conceived for work according to "Stay and play" type which prefers care for patients already in the landscape and transport to the hospital follows only after patients' condition stabilization. Therefore medical facilities of the vehicle answer the needs of intensive care. It includes equipment for artificial support of life functions, monitor for following cordial activity with possibility of automatic evaluation, storage and digital data transmission, infusion and intratube facilities, machines for release of injured and many others.

The ambulance given is constructed in cupboard mode that makes possible to utilize every centimeter of space for equipment, medicines and instruments. Super-structure is produced by ALUVAN sandwich technology from light alloys and compositions, provided with electrical distribution and security elements. Tail two-wing doors, the side entrance doors, the door for medical case and the door for scup ram and vacuum mattress are closed by central Mercedes-Benz lock as well as the car cab.

The vehicle is assigned not only for the highest priority appeals, but also for all other current troublesome calls.

Interior facilities:

- counter-slippery spill floor
- fully automatic positional table
- fluorescent lighting with positional point lights are integrated into ceiling tube
- in the left side there are two seats with integrated security belts
- in the right side there is an aluminum shelf system with necessary medical facilities including life-packs, suckers, etc.
- in the front there is a stainless steel table with wash-bowl, and one bench
- over the front bench there is a shift window for visual communication with a driver

Special sound, cautionary lighting, blue beacon as well as colored vehicle indication including all prescribed pictograms are in accordance with valid legal norms of the day.
