

SPECIAL ATTACHED MODULE FOR LIQUIDATION OF CONSEQUENCES OF EXTRAORDINARY OCCURRENCES

Special attachment is joined with the 04 category connectable highway vehicle. Lower construction is three-axle attachment for 1150 mm height of traction vehicle turn-table with low bottom floor of max. 900mm high over ground, heightened in the front part with the use of standard size limits.

On the carriage part the steel welder is positioned, to the front part of which shift sides of sitting room and control box are set in. In the front part of the sitting room the kitchen unit, pneumatic telescopic pole and central air condition system are incorporated. In the air conditioned control box there are three workplaces for operators with connection to the module computer network and outlook of 360* range around the module. In the middle part of the module under the control box there is a place for storage of min. 10 pieces of mobile folding beds and mobile containers for medical attributes. Over the attached axes there is situated social section of the module which incorporates two chemically washed toilets and shower corner. In the tail technological and storage parts of the module are placed. In this part shelf system for storage of trunks with medical materials as well as all technological units necessary for module working including electrical generator and heating units are placed.

The whole attachment is constructed in the way to secure complete activation at the occurrence place by a uniform staff and during the period of about 30 minutes from the arrival time at the place of occurrence. Furthermore, the module is functionally fully independent from exterior energy sources (electrical energy, water, medical oxygen, fuel materials) for the period of min. 24 hours.
